

Connect, Extend, Challenge

Thinking Routine

Directions – Consider what you have just read, seen, or heard, and then ask yourself:

Guiding Questions

- What framework guides your system change process?
- What inclusion practices are critical for the inclusion of students with disabilities, including students with complex support needs?
- What data do you use to indicate needs, progress, and impact?
- Adaptive & Technical Leadership
 - As it pertains to impacting the inclusion of students with disabilities,
 - What have you had authority over?
 - Where have you used influence?
 - Where can you use influence in the future?
 - How have you engaged critical perspectives to overcome barriers to including students with disabilities?
 - What questions and strategies have you used to approach adaptive challenges?
- What practices have worked well (e.g., evidence-based or promising practices)?
- What barrier or challenge could this team collaboratively problem-solve?
